

Mito-RTG Lecture Series
by PIs of the CRC 1218 on

"The Fundamentals of Mitochondrial Biology"

Time: Wednesdays, 12.00 p.m.

Duration: 90 min

A monthly lecture series on important aspects of mitochondrial biology, modern methods and technologies will be given by PIs of the CRC 1218. The lectures aim at conveying broad and deep knowledge of mitochondrial biology, and to foster overarching and interconnecting thinking.

This lecture series is open to all scientists working on mitochondria biology-related projects and interested scientists from other fields.

24.05.2017, 12 p.m.

CECAD, ground floor Lecture Hall

Thomas Langer

"Introduction to mitochondrial biology "

21.06.2017, 12 p.m.

Location: CECAD, ground floor Lecture Hall

Jan Riemer

"Mitochondrial metabolism "

19.07.2017, 12 p.m.

CECAD, ground floor Lecture Hall

Mafalda Escobar-Henriques

"Mitochondrial structure and sub-compartments: proteins and lipids "

11.10.2017, 12 p.m.

CECAD, ground floor Lecture Hall

Elena Rugarli

"Mitochondrial biogenesis and its regulation "

22.11.2017, 12 p.m.

CECAD, ground floor Lecture Hall

Aleksandra Trifunovic

"Mitochondrial genetics and gene expression "
